Assistant Lecturer
Dept. of CSE , IIUC

## Introduction:

We started this project to build a digital platform for real estate services. Our main goal was to help users easily view, buy, or sell properties online. We planned and worked step by step — starting from the basic design to adding important features for users and admins.

## Project Task Progress Table:

| Date | Task Description | Completion (%) |
|---|---|---|
| 30-06-2025 | Project setup completed, basic frontend layout designed. | 70% |
| 01-07-2025 | Backend API structure initialized, database schema created. | 80% |
| 03-07-2025 | User Authentication & Property Listing features done. | 90% |
| 05-07-2025 | Dashboard and Property Edit/Delete functionality added. | 95% |
| 07-07-2025 | Final testing, bug fixing, UI polishing, and deployment. | 100% |

## Conclusion:

We followed a proper plan to complete each part of the project on time. By 7th July 2025, all features will be finished and the platform will be fully ready. Through this project, we gained real-life experience in teamwork, web development, and technical problem-solving.
